Cleaning Checklist

Use this checklist to break your spring cleaning into manageable, bite-sized tasks. Remember: work from the top of the room down to the floors to keep the mess moving in the right direction.

Kitchen & Dining

- Microwave:** Mix 2 cups water with 2 tablespoons vinegar; microwave for 5 minutes (plus 15-minute rest) to steam away grime.
- Refrigerator:** Remove shelves/trays (wash in dishwasher), wipe interior, and discard expired pantry/fridge items.
- Appliances:** Degrease range hood filters, wipe down stove exterior, and empty toaster crumb tray.
- Cabinets/Drawers:** Remove contents, wipe surfaces, and discard or donate items no longer used.

Laundry Room

- Dryer:** Detach and clean the exhaust vent.
- Washer:** Clean the drum with specialized packets; leave the lid/door open after use to prevent mildew.
- Floors:** Move appliances to sweep/mop behind them.

Living Areas & Bedrooms

- Furniture:** Move sofas to vacuum underneath; remove cushions to clean crevices.
- Surfaces:** Dust ceiling fans, light fixtures, and baseboards from the top down.
- Windows:** Clean glass and wipe down sills.

Bathroom

- Showerhead:** Soak in vinegar to remove mineral deposits and hard water buildup.
- Surfaces:** Clean mirrors, scrub sink/faucets, and deep clean grout.
- Toilet:** Deep clean and sanitize exterior and bowl.
- Liners:** Replace or wash shower curtain liners.

Bedrooms & Closets

- Bedding:** Launder all linens, including comforters.
- Mattress:** Rotate your mattress to ensure even wear.
- Closet Rotation:** Swap seasonal clothes. Place winter items (sweaters, wool socks, heavy blankets) into bins for storage to make room for spring/summer apparel.
- Under-Bed:** Vacuum dust bunnies and organize under-bed bins.

Need Additional Space?

If your spring cleaning revealed that you have too many items but not enough room, a storage unit can help you regain your living space. We provide space, not outcomes.
